#### Update on H1N1Vaccination situation

As most of you are well aware, the H1N1 vaccine has been coming in much more slowly than initially anticipated. As such, it has been difficult to schedule the school based vaccination clinics and we need to modify our goals slightly. We do expect increased shipments beginning next week; however we are not able to commit to any school clinic until the vaccine is in our possession.

We will be holding a “target group clinic” on November 9<sup>th</sup> in Catskill which is open to the public. There are limited doses of vaccine available for this date, but our goal is to vaccinate more of the group that will be missed by the school based clinics (pregnant women, caregivers of children under 6 months old and additional healthcare workers). People who wish to be vaccinated at that time, must pre-register through the link on [www.greenegovernment.com](http://www.greenegovernment.com) website or by calling Greene County Public Health at 719-3539.

As vaccine arrives, we will begin the school based clinics as we discussed earlier. Soon, we will be delivering to you, the forms that will need to go home for parents to fill out and return. These will likely be distributed even before we have a firm date for your school.

If you have any questions, concerns or need some assistance please feel free to contact this office.
